MODEL OVERVIEW

Model TXB belt drive fans are designed to exhaust air up to 35,000 CFM in high static pressure applications to 3-1/4". The aluminum exterior provides an attractive appearance. Belt drive results in lower operating RPM and sound levels, making the Model TXB well suited to applications where quiet operation is important. Belt drive also permits easy performance adjustments when needed to balance the total ventilation system. The non-overloading backward inclined wheel with its higher static pressure capability makes this unit suitable for either ducted or nonducted applications. Its roof or sidewall mounting options permit location near the area to be ventilated, allowing short duct runs and more efficient operation.

Isolation of motor and drive components from the airstream and the high velocity vertical air discharge make the Model TXB ideally suited for the removal of dirty contaminated and/or high temperature air from processes and buildings. Typical applications include restaurant hoods and similar kitchen exhaust ventilation, fume and smoke removal, laboratory fume hood exhaust and chemical process exhaust. The TXB line of fans is available in a variety of construction options, see the chart above for the TXB that is right for your application.

Model TXB-UL762 is available in our Quickship program. Sizes 8-24 are available for next day or 3-day shipping from stock.

TXB SPECIAL APPLICATIONS

High Wind Load and Hurricane Zone construction certified fans from S&P:

Model TXB/TXB-HP/TXBRHUL

Belt Drive Centrifugal Upblast Roof Exhausters
with certified **HWL** (High Wind Load/Hurricane Zone) Construction Option.

The TXB (belt drive) series of centrifugal upblast roof exhaust fans with the HWL construction option are suitable for use in high wind load applications which call for products with enhanced safety and structural resistance. The TXB series is ideal for general roof mounted clean air exhaust applications where the air is discharged directly up and away from the roof surface.

The TXBRHUL series is ideal for general roof mounted grease laden air exhaust applications where the air is discharged directly up and away from the roof surface.

- The only fans designed, developed, tested and manufactured in a hurricane zone!

OPTIONS/ACCESSORIES

Automatic Belt Tensioner: Available on sizes 8-24, The Automatic Belt Tensioners eliminate the need for regular manual retensioning of drives, and the risk of inadvertently over-tensioning drive components is avoided and overall drive operating efficiency is enhanced. Benefits include reduction in startup and maintenance costs, increased belt life, increased drive efficiency, and ensure drive components do not snag obstructions.

Roof Curb: Prefabricated heavy-gauge galvanized steel, welded construction, 12" high (other heights are also available) with 1-1/2" wood nailing. Assures perfect fit of exhauster to roof opening. Options include burglar bars, single or double pitch construction and hinged curbs for easy duct access.

Common Curb: Designed to allow both the supply fan and exhaust fan to be mounted on the same curb. This curb requires only one roof opening and speeds installation time.

Motor Operated Damper: Motor operated aluminum damper for positive closure against backdraft. (Not for UL762 use).

Automatic Damper: Automatic aluminum damper for ease in installation and effective backdraft protection. (Not for UL762 use).

Grease Grabber or Aluminum Grease Trough: Trap designed for fast and inexpensive replacement. Grease collects in a container for safe and sanitary disposal. Keeps roof clean with proper use.

Wall Mount Kit: Kit allows 8-24" fans to be wall mounted. Assembled as standard on all TXDW units, not available for non wall mount units. See current submittal for details.

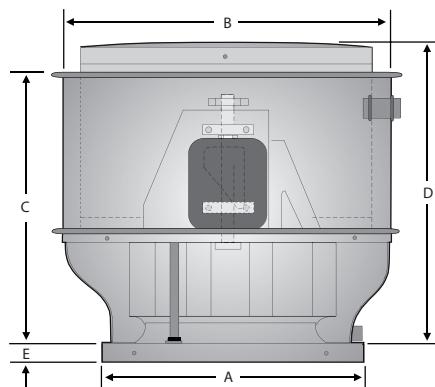

Special Coatings: Powered roof exhausters often require special coatings for protective and decorative purposes. Available coatings include: Synthetic Resin, Epoxy, and Heresite (air-dried phenolic). Contact your representative or the factory for more information on available coatings and colors.

Curb Hinge Arrangement: The curb hinge arrangement provides easy access to the exhaust fan, backdraft damper, and duct for servicing and cleaning.
