- All materials are G90 galvanized steel. All hoods are factory assembled.
- Due to shipping limitations, 87" and larger hoods will ship separate requiring field attaching. Assembled 123" hoods must ship by double drop deck flat bed truck. This will affect normal freight rates.
- Hoods will hinge and front fan panel is removable for access to fan and optional damper.
- Propellers are 2, 3, 4, or 6-bladed adjustable pitch, air-foil aluminum (Fixed pitch steel and Aluminum are also available).
- Dampers mount on accessory flanges inside curbs due to space restrictions and warranty clearance conditions.
- Delay switch required on models 5HP and larger (with motorized damper).
- Filters are 2" cleanable, aluminum and may ship separate for field installation. Specify if factory installation is required and consult factory.
- Filtered 54" fan performance is certified by Breidert Air Products.
